Venue
Indianapolis Marriott North
Keystone Mall
3645 River Crossing Parkway
Indianapolis, IN 46240
847-696-1234

Educational Objectives
• Identify strategies to treat COPD and Alpha, exacerbations
• Identify which COPD and Alpha, treatments work and which ones do not
• Describe how radiofrequency energy leads to reduction of airway smooth muscle and improves asthma control
• Discuss the role of minimally invasive local treatment options for early stage cancer, including surgery and radiotherapy
• Define and utilize treatment options in the management of smoking cessation
• Describe the results of the National Lung Screening Trial
• Identify home environment risk factors associated with lung cancer diagnoses
• Identify patient education gaps and practice patient communication techniques

Continuing Education Credits
St. Vincent Hospital and Health Care Center, Inc., Indianapolis, IN (ISNA No. CNEP 10-10, 12/1/2013) is an approved provider of continuing nursing education by the Indiana State Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. Nurses attending this conference may earn up to 6 Continuing Nursing Education contact hours.
The American Lung Association in Indiana is an approved continuing education sponsor through the Indiana Department of Professional Regulations. This course has been approved for 6 continuing education units for Licensed Respiratory Care Practitioners.

Oxygen Refills—Patients
Oxygen refills and wheelchairs will be available to attendees, courtesy of local area medical equipment companies.

More Information/Special Requests
Participants with special need requests should call 317-819-1181 or email meghan.mcnulty@lungin.org by May 18. We are here to make sure you are safe and comfortable.

### Inspirational Speaker

Inspirational speaker Len Geiger is an Alpha, Antitrypsin patient who was diagnosed in his mid thirties. By the time he received his double-lung transplant at the age of 43 from donor 14-year old Korinne, his FEV1 scored as low as 15%. Days after his surgery, his FEV1 measured at 100%. Now, Len competes in sprint triathlons and works as the Director of Patient Advocacy for Centric Health Resources, and eases the fears of Alpha patients and bridges the gap between patients and doctors.
