

## Event Overview

Thank you for joining us for the 2022 Fight For Air Climb Detroit! Here's our Event Day overview with the planned schedule events, route description and Route Map. Please note each participation type will be scheduled in different flight segments on Climb Day. Additional venue and day of event information will be released in the Event Week Guide the week of April 25. Official flight times will be shared no later than April 27.

### Event Day Volunteer

Support Climb Detroit by volunteering on Event Day. Register as a Volunteer to join the incredible crew that helps to host the annual event. Climbers would also like to Volunteer on Event Weekend, please share your interest with an email to [EventsMI@lung.org](mailto:EventsMI@lung.org).

### Climb Your Way Virtual Climber

Can't join us on May 1? Climb Your Way. It's Your Climb, Your Way. This is for VIRTUAL climbers who are not planning to join us at Comerica Park.

### Firefighter & First Responder

Same route – new time! New in 2022, first responders and firefighters will be kicking off our event and will be the first to climb. Your route begins at the bottom of the stairs, then you'll proceed up to the 300 level. You'll be weaving up and down the 300 and 200 upper levels for an estimated 2,123 stairs which equates to about three-quarters of a mile. At the completion of the race, you'll head over the Pepsi Porch via the stairs from the 200 Level.

Climb in full gear to compete in the annual [Firefighter Challenge](#). EMT, police offers, military and other first responders will climb in the First Responder flights on the same route.

### Ultimate Climber

New this year, the Ultimate Climber will complete a “Power Hour”. You will race the clock and be challenged to see how many laps of the 300 Level you can complete in just one hour. Each lap covers 1,472 stairs. Ultimate Climbers will also be stepping up to the challenge by making a minimum fundraising commitment of \$250+.

### Elite Stadium Climber

Taking the same path as the Stadium Climber, this group will be in a separate flight and the first to kick off the Lower Level. Ideal for the Climber ready to race against the clock – the average times in 2021 was 10 min or less! If you are an athlete or experienced Climber, this group may be for you!

### Stadium Climber

The route has been expanded for '22. Climbers will start at the top of Section 101 and will weave up and down the full Lower Level. You will do a quick loop at the end to come across the Finish Line at the scoreboard. You'll then head down the concourse to celebrate on the Pepsi Porch. The new route covers 1,316 stairs which equates to a little over a half of a mile.
